

TaxBreeze Phase-II: Front End	
Sl.	Changes
	Major changes
1	Implementaion of domain name instead of IP
2	IP details to be removed, instead email domain should be captured.
3	Manage the users of a company when the company status is changed.
4	Implementaion of Help (Includes front end and admin design changes, keyword searching etc)
5	Show help icon of the top tabs, on mouseover, a small popup with short description will be shown. On "more", click it will be redirected to help page of that particular tab
6	Generic help page will show all the tabs help information + other help info
7	Enabling and disabling feature for the master data in the admin
8	Disabled features will be available for already submitted tax Returns. Master data changes made for the current tax year will be reflected in the tax filing for that year.
9	All the Deduction tabs to be consolidated to a single page/form
10	2 sub tabs, the submenu(Left panel) should be removed, instead sub menus to be put in a dropdown, a search facility to show the deductions should be provided.
11	New main tab for foreign assests with new features (Design Change + additional features)
12	Dashboard - Tax summary 2 tabs to show revised (Design Change)
13	If no revised return the tab should be invisible
14	Revise return
15	Upon e filing, if revised button clicked the status should change to inprogress, tax filing should be editable. Revision fees to be asked if insufficient credits
16	Review to show sub section status also (Design change)
17	Mandatory fields should be provided by PwC, so that status of each tab can be shown as red or green
18	Plan change auditing
19	If lower option plan selected and try file higher options then plan change, if higher option selected and filed only lower options then balance amount will be credited for future use, no refund
20	Currency field along with amount field (Design Change)
21	In application, where ever amount field is used, curreny should be placed.
22	The system should alert the user during Multiple Login. Upon clicking "Confirm", the system should log out the user from the previous session.
	Minor changes
1	Json changes
2	Platinum plan - email notification
3	XML prefill controls to be grouped (only Design Change)
4	Yearly Summary to show icon for revised return
